DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, 10-13, 15, 19-21, and 24 are allowed.
2. Applicant's arguments, see amendment, filed 06 October 2005 and pre-appeal brief filed 11 October 2005, with respect to claims 1-4, 10-13, 15, 19-21, and 24 have been fully considered and are persuasive. The 35 U.S.C. 103(a) rejection of the claims has been withdrawn.
3. The following is an examiner's statement of reasons for allowance:

Claims 1-4 are allowable because the prior art does not teach "making at least a portion of the directory cache unavailable to one or more resources in the system in response to determining that the error is uncorrectable, wherein making at least the portion of the directory cache unavailable comprises generating a cache miss in response to a request to access the directory cache;" and the other limitations occurring "in response to determining that the error is uncorrectable". The prior art teaches making a portion of the directory cache unavailable due to an error and then determining if the error is correctable or uncorrectable.

Claims 10-13, 15, and 19 are allowable because the prior art does not teach “determine if at least one uncorrectable error exists in the directory cache; place at least a portion of the directory cache offline in response to determining that the error is uncorrectable, wherein placing at least the portion of the directory cache unavailable comprises generating a cache miss in response to a request to access the directory cache;” and the other limitations occurring “in response to determining that the error is uncorrectable”. The prior art teaches making a portion of the directory cache unavailable due to an error and then determining if the error is correctable or uncorrectable.

Claims 20, 21, and 24 are allowable because the prior art does not teach “determine a multiple-bit error in data stored in a directory cache of a domain; isolate at least a portion of the directory cache from one or more resources in the domain while the domain is active, in response to determining the multiple-bit error” and the other limitations occurring “in response to determining that the multiple-bit error”. The prior art teaches isolating a portion of the directory cache due to an error and then determining if the error is single bit error, correctable, or a multiple-bit error, uncorrectable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
